SODA ASH AND SODIUM SULFATE IN APRIL 1997

Natural soda ash production in April was 834,000 metric tons, 9% lower than the previous month's production, according to the U.S. Geological Survey. Ending inventories were estimated at 251,000 tons, a 15% decrease from that of the preceding month. Wyoming trona production in April was 1,470,000 tons. Total production of chemical caustic soda as soda ash equivalent, based on data from all three producers, was 14,700 tons in April.

Apparent consumption of soda ash for March was 524,000 tons, 13% lower than the March 1996 level of 601,000 tons. Exports and imports of soda ash in March 1997 were 376,000 tons and 8,760 tons, respectively. The cumulative soda ash statistics through March 1997, compared with those of the corresponding period in 1996, were as follows: production 7% higher, imports 8% higher, exports 8% higher, ending stocks 15% higher, and apparent consumption 2% higher.

 $^{1/\,}Data$ are rounded to three significant digits; may not add to totals shown.

Source: Bureau of the Census, as adjusted by the U.S. Geological Survey, using Journal of Commerce trade data and information.

^{1/} Data are rounded to three significant digits; may not add to totals shown.

^{2/} Production data includes soda ash equivalent from soda liquors only. Soda ash equivalent from mine water is not included. Soda liquors for the current year 1997 are withheld to avoid disclosing company proprietary data.

^{3/} Because of previously unreported inventory in remote locations by one producer, ending stocks are somewhat higher than the level of prior months.

^{2/} Free alongside ship (f.a.s.) value at U.S. ports.

^{3/} April 1997 data not available at time of publication.
